

Bring Mayon to more learners.

Mayon Rajan is a free, true-scale educational visualization of Mayon Volcano for learners, educators, and curious visitors. It combines landscape exploration, historical context, source-linked learning materials, and clearly bounded hazard scenarios.

What you can share

Interactive field trip A guided, true-scale Mayon experience for shared screens, self-guided exploration, and public learning.	Teacher Launch Kit A 45-minute lesson flow, student worksheet, slide deck, printable poster, and class-view launch.
Embed and share tools A compact website embed, silent demo video, newsletter-ready description, and social sharing materials.	Sources and limits A claim-level record for terrain, imagery, history, hazards, conceptual interiors, and the update policy.

Accurate description for a website or newsletter

Mayon Rajan is a free, true-scale educational visualization of Mayon Volcano. It combines landscape exploration, historical context, source-linked learning materials, and clearly bounded hazard scenarios. It is not a live warning, forecast, evacuation, navigation, or emergency-response tool. For current activity and public-safety instructions, follow PHIVOLCS and local authorities.

Suggested link text: Explore Mayon Volcano through a free educational virtual field trip.

Public-safety boundary

Mayon is an educational visualization, not a live monitoring, forecasting, route-planning, or emergency-response system. Please retain this boundary whenever recommending or embedding it.
